Tab. S1. PCR cycling conditions for the primer DRB1, which targets a 188 bp fragment of the cytochrome oxidase I (COI) gene (Blackman *et al.*, 2020).

	Temperature (°C)	Time (min)	Number of cycles
Initial denaturation	94	10	1
Denaturation	94	1	37
Annealing	65	1	
Extension	72	1	
Final extension	72	7	1
